Small Stand Off Connector

Medium Stand Off Connector

Large Stand Off Connector

Fitting a Wall mounted acrylic sign with Stand off connectors Version

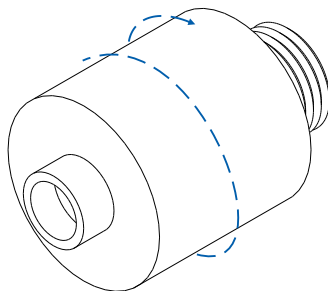

1. Place the panel into the position you require it and mark the positions of the holes on the wall

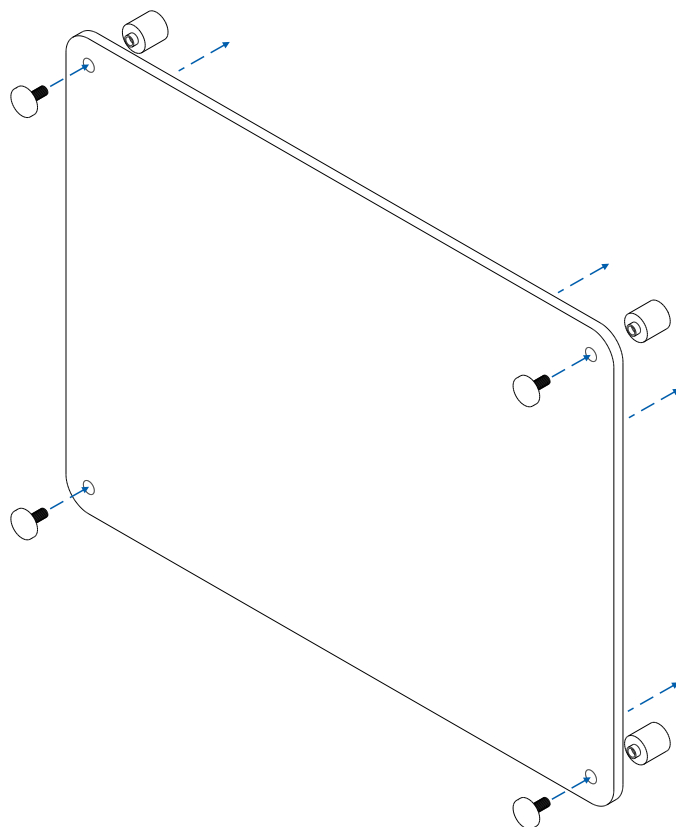

2. Now screw the small internal brass section of the Stand off connector to the wall in the position of the hole marks

3. Screw the Main bodies of the Standoff connector over the top of the wall mounted brass sections.

4. Place the holes of the panel over the body of the Stand off connector (Wall mounted), then simply screw of the top section of the Stand off to hold the panel in place.

5. Job Done!!!
