

Tools Required

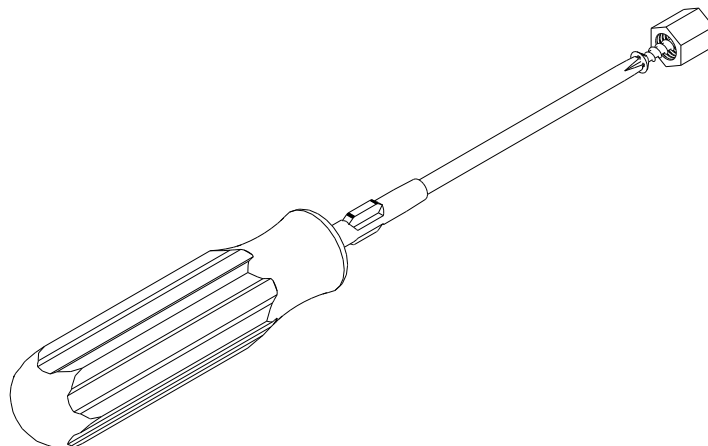

# WALL MOUNTED LETTERS WITH NICKEL LOCATORS

## Assembling & Mounting

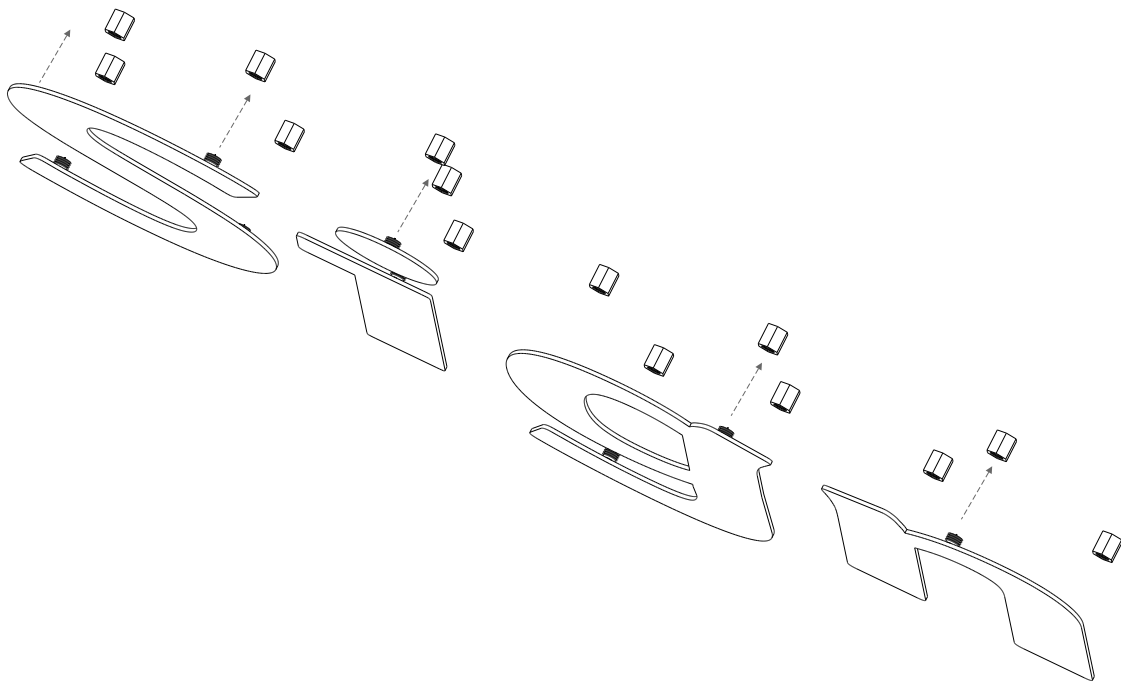

1. Using the Paper Template - Mark the positions of the locators on the wall using a drill or marker.

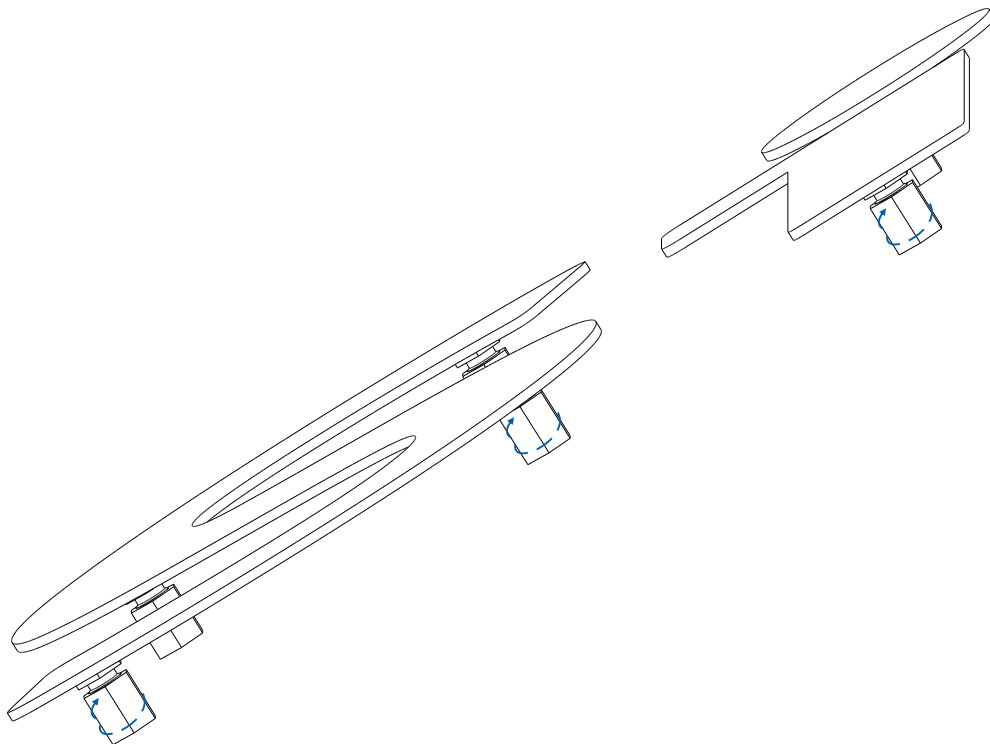

2. Now screw the female section of the nickel connector to the wall in the position of the hole marks making sure not to over tighten as the locator will be required to spin.

**3. Connect the male section to female section on the wall.**

**4. Turn the female section of the locator, which will tighten onto the male section on the letter. ( A Spanner may be required )**

5. Your Wall Mounted Letters with nickel locators are now complete.
