

Tools Required

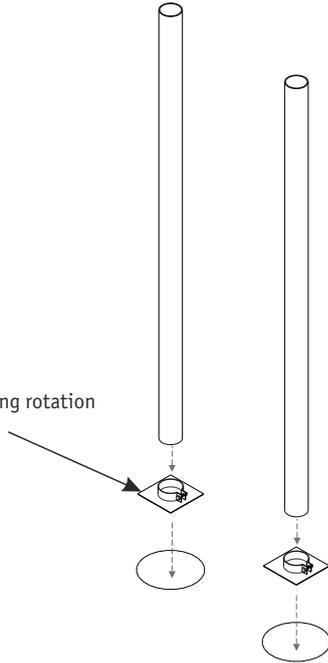

POST MOUNTED PANEL (SINGLE SIDED)

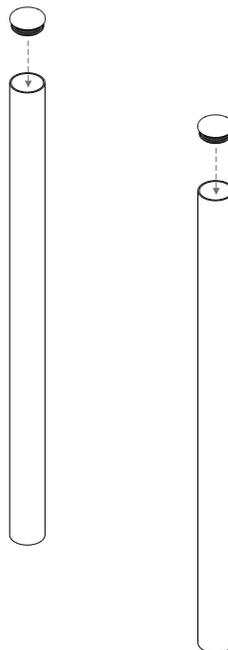

Assembling & Mounting

1. Dig holes and mount your posts in position required for your signage. (Please see website for further instructions)

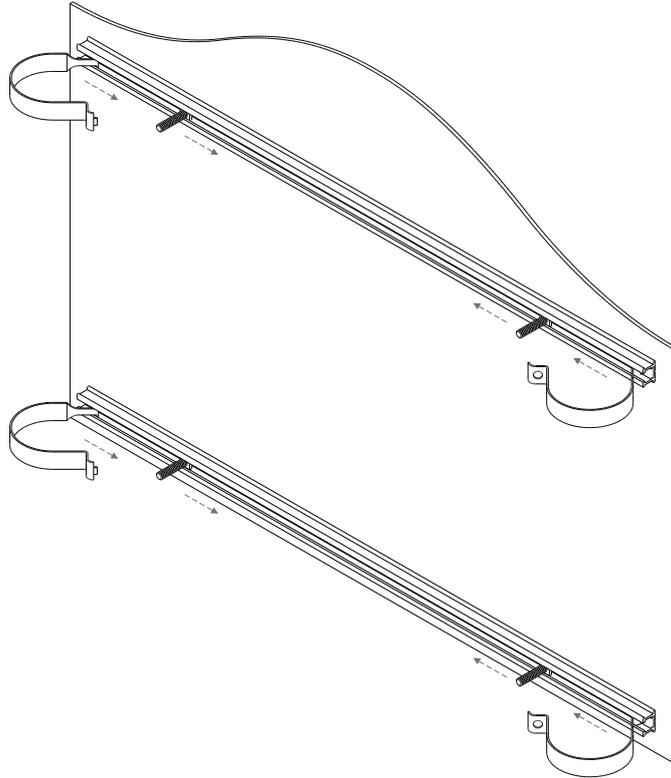

Steel Baseplates Recommended for stopping rotation when using round posts

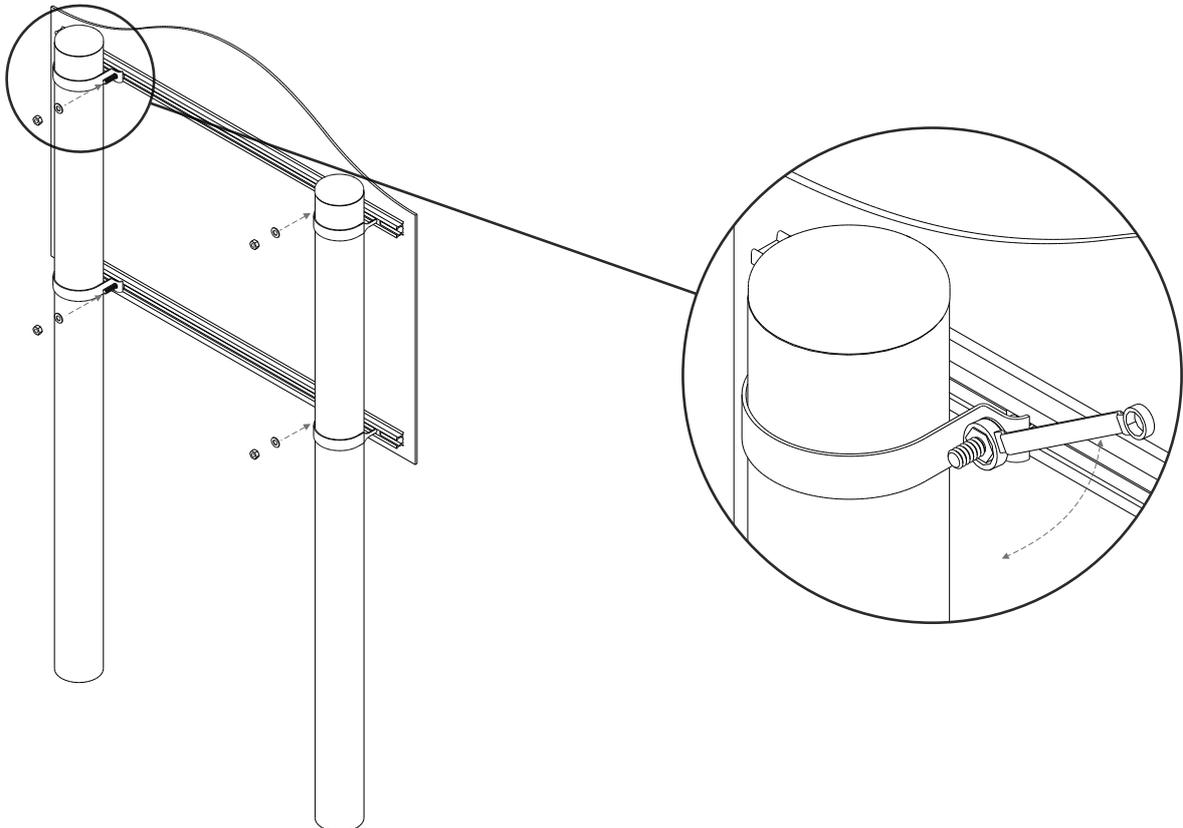

2. Place Your Caps or Finials to the top of your posts.

3. Slide the Square head bolts and the post clip into the channel rail. (as diagram)

4. Place the Sign Panel (with channel) against the posts and place the clips around the posts then connect it to the bolt. Then use the spacer and nut to tighten the sign in position.

5. The Sign is now complete
